

WHEN EVIDENCE INFRASTRUCTURE BECOMES STARTUP INFRASTRUCTURE

A founder-and-systems record of provenance, versioned exports, public verification, and maintaining a product through a live dispute.

STORY ANGLE

THE EVIDENCE INFRASTRUCTURE IS PART OF THE STARTUP’S OPERATING HISTORY.
Transaction indexes, source IDs, retrieval dates, scope notes, checksums, and a still-running product make the company's factual claims inspectable. That infrastructure does not settle the unresolved legal issues.

QUICK READ

WHAT THE RECORD SHOWS

- 1. Public chain records provide timestamps and full transaction hashes for identified purchases.
- 2. The source room distinguishes original records, collected datasets, party positions, and unresolved questions.
- 3. Provenance improves auditability but does not establish access, intent, confusion, or damages by itself.

REPORTER CHECKS

AVAILABLE VERIFICATION RECORDS

- Transaction records traceable from index entries to public explorer receipts.
- Version history, correction handling, and checksums for the evidence pipeline.
- Founder records concerning work displaced from the product roadmap.

PUBLICATION GUARDRAIL

EVIDENCE BOUNDARY

The TTAB matter is pending. No final merits decision has issued.

Public records establish chronology and publication, not access, copying, intent, actual confusion, causation, damages, private approval routing, licensor knowledge, or the Board's future ruling. Attribute Lucky Machines' positions and first-person accounts. Seek Mattel's response independently.
